

ESD Clean and Treatment Waffletechnology Card Reader Cleaning Cards

KW3-HESDB20

This two-step product is designed to remove Electrostatic Discharge (ESD) from magnetic heads, while both cleaning and inhibiting rapid build up of ESD within the card reader.

When inserted it will:

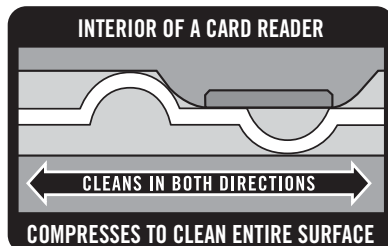

- Clean the top, leading and trailing edges of the magnetic heads and card pathways
- Treat the magnetic heads from rapid build-up of ESD

Use as:

- A scheduled maintenance product to prevent ESD caused card reader failures

How Waffletechnology® Works

The cleaning waffles are flexible, raised platforms that allow the card to clean previously unreachable areas within the equipment.

Dirt Build-up
Causes Failed Transactions!

Step 1
(Use First)
Cleaning Card

The **.019 Waffletechnology™** Card Reader Cleaning Cards significantly increases the life and reliability of card readers

Usage Recommendations:

- External/High use areas - once per week
- Internal/Low use areas - once per month

Static Build-up
Can Damage Readers!

Step 2
(Use Second)
Treatment Card

The consistent use of **Waffletechnology™** Treatment Cards prevents electrostatic charge buildup significantly increasing the life and reliability of card readers

Usage Recommendations:

- External/High use areas - once per week
- Internal/Low use areas - once per month
