

TransAct Technologies Thermal Print Head Maintenance Cleaning System

KWTRA-ITHB15

This product is designed to maintain the clarity and readability of linerless receipts printed by the Ithaca® 8000/8040 Linerless Label and Receipt Printers. Once inserted it will:

- Clean the thermal print head
- Clean the entire surface of the platen roller
- Clean printer pathways

Use as:

- A scheduled maintenance product to maintain clarity of your labels and receipts
- An emergency maintenance product to correct printed label and receipt errors

How Waffletechnology® Works

The cleaning waffles are flexible, raised platforms that allow the card to clean previously unreachable areas within the equipment.
